

New Jersey Corruption Exposed

- Prepared by Thomas Caggiano, 10 East Drive, Stanhope, N.J. 07874 thomas_caggiao@yahoo.com 973-347-4354
- The following letter list the dozens of New Jersey State officials and Municipal Officials who were made repeatedly aware of the corruption in the Borough of Stanhope for years as thousands of letters and correspondence and audio recordings were distributed and the web site which has been publishing the evidence in only a small part with letters, photos, drawings and has published on the internet for many years.
- As of Nov 30, 2008 the corruption is ONLY worse as the Sussex County Board of Chosen Freeholders willfully modified its posted official minutes which were approved and posted of my Nov 5, 2008 presentation of evidence on Nov 25, 2008. There is NO lower level of corruption in New Jersey as it makes Chicago, IL look like an angel in comparison.
- Below is a three page letter, signed by fifteen (15) property owners in the Borough of Stanhope that was provided to its corrupt Land Use Board on May 8 with its corrupt Law firm of Dolan and Dolan P.A. with lawyers Roger Thomas, Esq. and John Leo III, Esq., the corrupt professional engineers were its person who did NOT attend the Land Use Board and never had any contract in 2006, the Vice President of Omland Engineering Associates Eric Keller, a professional engineer and professional planner who posed as a municipal engineer in Town Council meetings but did NOT attend Land Use Board meetings as the corrupt professional engineer of John Cilo Jr. Associates called himself with the knowledge of the corrupt Town Administrator and others something called Board Engineer but he did NOT have a valid written contract per the Local Public Contracts Law with a required newspaper announcement containing four elements.
- False Area in Need of Redevelopment Plans were prepared by professional planner P. David Zimmerman buy using money laundered into an escrow account by a large developer Hovanian Development to pay the corrupt professional planner and professional engineer and the two law firms. The Land Use Board and its corrupt Mayor, Governing Body allowed illegal development by E.N.F. Development Co. LLC on Block 10902 Lots 10 and 12 and then on Block 10903 Lots 13 and 15 and Lot 15 is not even E.N.F. Development Co. LLC property. The corrupt Land Use Board and the corrupt State's Sussex County Soil Conservation District certified a false 1/2 project Soil Erosion and Sediment Control Plan for only 1/2 the project on Block 10902 Lot 10 twice. The Land Use Board and Sussex County Soil Conservation District approved and certified the Soil Erosion and Sediment Control Plan for Block 10903 Lots 13 and 14 after development started, shade trees to be protected were destroyed, no entrance with gravel to temporary access was ever built, tons of boulders were placed on Lot 15 and Lot 14 does NOT even exist in the Borough of Stanhope. Adverse impacts on adjacent property on Oak Drive also occurred as the residents of those impacted properties complained in person in the Land Use Board and they carried around for signature the letter below which I assisted in the preparation on a pro bono basis as they requested my support which I provided immediately and participated in the Land Use Board and Town Council meeting informing them on the record of the massive violations with State and Municipal laws and provided a CD with dated photographs of the many violations.
- After 2.5 years the felons are still in charge although the former Town Administrator Teri Massood ran away from the Borough when the Corrupt Department of Community Affairs' Government Record Council sent its complaint against the corrupt former Town Administrator Teri Massood and the former Town Municipal Clerk Battaglia to the corrupt Office of Administrative Law Judges namely its Chief Laura Sanders and the corrupt Judge J. Howard Solomon, ALJ.
- The tyranny has only increased exponentially among Federal Department of Justice officials, Sussex County Board of Chosen Freeholders and Superior Court and Municipal Judges detailed on the Base page of ThomasCaggiano.com.
- We await a new President Obama and a new U.S. Attorney as the former corrupt U.S. Attorney Chris Christie is now running for Governor of the most corrupt State in the Nation = New Jersey against our corrupt current New Jersey Governor Jon Corzine.
- This letter was also provided to our corrupt Mayor Diana Kuncken and corrupt Town Council aka Governing Body on May 30, 2006 in an Open Public Meeting - Below is one of hundreds of letters flooding the corrupt Federal and State agency and its corrupt Superior and Municipal court systems.

STANHOPE
PROVIDED TO ENVIRONMENTAL
COMMISSION 5/11/2006

10 East Drive
Stanhope, NJ 07874
May 8, 2006

Borough of Stanhope
Land Use Board
77 Main Street
Stanhope, NJ 07874

Dear Chairman,

Subject: Block 10903 Lot 13 and 14 Development, developer E.N.F. Development Co. LLC.

Whereas E.N.F. Development Co. LLC (ENF) illegally developed the minor subdivision

on Block 10902 Lots 10 and 12 and as Pittenger and Keith Inc's Professional Engineer Mr. Wendell Inhoffer and Professional Planner Ms. Judith Keith prepared a false Soil Erosion and Sediment Control Plan certified by Sussex County Soil Conservation District (SCSCD) on Oct 8, 2002 for a single home without an complete application submitted to the Land Use Board and another false SESCO for Block 10902 Lot 10 certified only by SCSCD on Mar 24, 2004 and whereas ENF did not protect 4 large shade trees plotted on Lot 10 and destroyed them and provided a false report by Mr. Franklin Dawalt Jr and false memorandum by Ms. Judith Keith, built walls in violation of the approved site plan and walls in a restricted deed, whereas the 6 Oak Drive rear deck was built on the wrong side of the house and whereas as-built drawing were never prepared as required by the restricted deed and the Board of Adjustment agreement with Eleanor Dawalt and whereas the Land Use Board has a petition signed by all the surrounding adjacent property owners of the minor subdivision and letters from each property owner wherein nuisances and trespasses occurred on adjacent properties with complete disregard for the protection of private property, this historical evidence available to the Land Use Board should be considered in denying the Medium Density Residential Lot Area variance requested by ENF of its requested 20% Lot Area variance for the subject development. Furthermore, we request the Land Use Board to notify the appropriate person within the municipal building that the lot shall be forever recorded as "unbuildable" and no further time be expended by the Land Use Board and immediately cease its review of an incompetently prepared SESCO as it violates the State Soil Erosion and Sediment Control Act codes and standards, the Stanhope Land Development Code Chapter 100 and the Shade Tree Commission Code Chapter 53 which are grossly deficient and as such formal complaints will be submitted to the Board of Engineers and the Board of Professional Planners for continued demonstration of gross professional incompetence by Mr. Inhoffer and Ms. Keith.

As the Land Use Board is aware, the Board of Engineers under the leadership of Mr. Arthur Russo is investigating the prior Stanhope Borough Engineer John Cilo Jr., ENF's two professional engineers Mr. Inhoffer and Mr. Schneider and the State's professional engineer

1

Mr. Sedivy for preparing obviously false SESCOs and memorandum or approving them and the executive director Mr. Hsu of the Board of Professional Planners is investigating Ms. Judith Keith for preparing an obviously false SESCO and other memorandum. Furthermore, the Governor of New Jersey has directed the New Jersey Attorney General Ms. Farber to conduct a criminal investigation and Senator Lautenberg wrote on the behalf of our neighborhood to the U.S. Attorney's office wherein a member of our community met with the Assistant U.S. Attorney Mr. Nobile and his staff for two hours.

As the Land Use Board is aware, the Commissioner of the Department of Community Affairs Ms. Levin, the Commissioner of the DEP Ms. Jackson, the Director of the Department of Consumer Affairs Ms. Ricketts, the executive director of the Board of Engineers Mr. Russo, the executive director of the Board of Professional Planners Mr. Hsu, the Secretary of Agriculture Mr. Kuperus, the Director of Agriculture Ms. Purcell, the executive secretary of the State Soil Conservation Committee Mr. Sadley, the Acting Director Office of Government Integrity Ms. Tracy Thompson, the New Jersey Attorney General Ms. Farber, the Director of the State Commission of Investigation Mr. Rockoff, executive director of the General Record Council Ms. Catherine Starghill, the Department of Criminal Justice -- Special Prosecutions Branch Mr. Czepeil, the Director of the Department of Criminal Justice Mr. Paw, the U.S. Attorney's Office Mr. Nobile, the New Jersey Attorney General Ms. Farber and Governor Jon Corzine himself are all aware of the illegal development by ENF at Block 10902 Lot 10 and 12 minor sub-division and unlawful issuance of two certificates of occupancy and are conducting a criminal investigation as directed by our Governor "with all due attention and consideration".

Previously Senator Littell, Assemblywoman McHose, Assemblyman Gregg, the Land Use Board, Stanhope's Environmental Commission and seventeen surrounding adjacent property owners petitioned the Town Council and State authorities to comply with Land Development Codes, the site plan grading profile and restore the large shade trees that were destroyed. You are requested not to reward the developer that wantonly ignored our Land Development Codes, the Shade Tree Commission Codes, the State Soil Erosion and Sediment Control Act and its implementing N.J.A.C. 2:90-1 with a significant 20% variance in Lot Area size which we the resident's of the surrounding community by our signature below all request be denied.

Furthermore, the Soil Erosion and Sediment Control Plan submitted by ENF for Block 10903 Lot 13 and 14 is grossly incompetently prepared violating the Land Development Chapter mandatory critical slopes requirements which were also ignored during the Oak Drive development as boulders rolled down steep slopes and crashed into the rear fence of the unprotected rear fence at 5 Valley Road. Furthermore the developer undertook development on Block 10903 Lot 13 and 14 without the protective devices provided on the incompetently submitted Soil Erosion and Sediment Control Plan for the slopes and trees as shown on the SESCO and already has violated many codes.

Given the above facts, we the citizens demand the ENF's Lot Area variance be rejected and the lots declared unbuildable into perpetuity and the Borough of Stanhope records marked accordingly that the developer be notified in writing that no further efforts be

expended by the Borough of Stanhope and that all the adjacent property owners be provided such a letter of record for their retention.

We, the citizens of Stanhope, hereby demand the Land Use Board reject the Lot Area variance requested by ENF regarding its proposed development of Block 10903 Lots 13 and 14.
